

Western University
Faculty of Engineering
Department of Electrical and Computer Engineering

ECE 9065 – Web Technologies

COURSE OUTLINE 2021-2022

DESCRIPTION

The Web has been expanding in size and scope since its inception. Technologies have evolved to help manage and extend the scale and complexity of the Web. The goal of this class is to better understand the Web and its current trends future through hands-on exploration of several modern Web Technologies by designing, developing, and deploying a few web applications.

ENROLLMENT RESTRICTIONS

Enrollment in this course is restricted to graduate students in Department of Electrical and Computer Engineering, as well as any student that has obtained special permission to enroll in this course from the course instructor as well as the Graduate Chair (or equivalent) from the student's home program.

INSTRUCTOR CONTACT INFORMATION

Course instructor: Dr Jim Morey
Email address: jmorey2@uwo.ca
Office: TEB 380
Office hours: Tuesday 10:00am-12:00pm

COURSE FORMAT

Lecture/Lab Friday 11:30am-2:30pm in ACEB 1450
Content delivery is primarily intended as face-to-face, although circumstances may require online and hybrid delivery. All assignments must be submitted on Owl as well as demonstrated during class.

TOPICS

Topic #	Description	Learning Activities	Tentative timeline
1	Basic Tools		
	Git, Chrome browser, HTML, CSS, Javascript	<ul style="list-style-type: none">• Lectures• Installing• Assignment	Week 1-2
2	Evolving Tools		
	CSS preprocessors ES6 arrow functions CRUD with client-side storage	<ul style="list-style-type: none">• Lectures• Using Web services• Assignment• Reading code in-the-wild	Week 3-4

3	Standards		
	URL, XML, Unicode, SVG, wikis	<ul style="list-style-type: none"> • Lecture • Using Web services 	Week 5
4	Server-side Perspective		
	HTTP protocol Server Setup (AWS, Heroku) Node.js, PHP Databases (SQL and NoSQL)	<ul style="list-style-type: none"> • Lectures • Using Web services • Assignment 	Week 6-8
5	Frameworks and Libraries		
	Express and Angular D3	<ul style="list-style-type: none"> • Lectures • Using Web services • Project 	Week 9-11
6	Cloud Perspectives		
	Cloud native, Docker, ...	<ul style="list-style-type: none"> • Lecture • Discussion 	Week 12

SPECIFIC LEARNING OUTCOMES

Degree Level Expectation	Weight	Assessment Tools	Outcomes
Depth and breadth of knowledge	25%	Assignments Project Examinations	<ul style="list-style-type: none"> • Understanding of advanced concepts and theories • Awareness of important current problems in the field of study • Understanding of computational and/or empirical methodologies to solve related problems
Research & scholarship	15%	Assignments Project Examinations	<ul style="list-style-type: none"> • Ability to conduct critical evaluation of current advancements in the field of specialization • Ability to conduct coherent and thorough analyses of complex problems using established techniques/principles and judgment
Application of knowledge	30%	Assignments Project Examinations	<ul style="list-style-type: none"> • Ability to apply knowledge in a rational way to analyze a particular problem • Ability to use coherent approach to design a particular engineering system using existing design tools
Professional capacity / autonomy	10%	Assignments Project	<ul style="list-style-type: none"> • Awareness of academic integrity • Ability to implement established procedures and practices in the coursework • Defends own ideas and conclusions • Integrates reflection into his/her learning process
Communication skills	15%	Assignments Project Examinations Participation	<ul style="list-style-type: none"> • Ability to communicate (oral and/or written) ideas, issues, results and conclusions clearly and effectively
Awareness of limits of knowledge	5%	Assignments Project Examinations	<ul style="list-style-type: none"> • Awareness of the need of assumptions in complex scientific analyses and their consequences • Understanding of the difference between theoretical and empirical approaches

			<ul style="list-style-type: none"> • Ability to acknowledge analytical limitation due to complexity of practical problems
--	--	--	--

ASSESSMENTS

Assessment Type	Material Covered	Tentative Due Date	Weight
Assignments (three)	Topics 1, 2, and	Sept 23, Oct 7, Oct 28	30%
Project		Dec 2	15%
Midterm	Topics 1, 2, 3	Oct. 15	15%
Participation in class activities			5%
Final exam			35%

Activities in which collaboration is permitted:

- Healthy collaboration is permitted in coding activities for Assignments. Discussing code with colleagues, helping colleagues debug code, and helping set-up and configure tools would be considered healthy collaboration.

Activities in which students must work alone (collaboration is not permitted):

- Written Assignment answers.

REQUIRED TEXTBOOK

None. Required material will be provided.

CHEATING, PLAGIARISM/ACADEMIC OFFENCES

Academic integrity is an essential component of learning activities. Students must have a clear understanding of the course activities in which they are expected to work alone (and what working alone implies) and the activities in which they can collaborate or seek help; see information above and ask instructor for clarification if needed. Any unauthorized forms of help-seeking or collaboration will be considered an academic offense. University policy states that cheating is an academic offence. If you are caught cheating, there will be no second warning. Students must write their essays and assignments in their own words. Whenever students take an idea or a passage of text from another author, they must acknowledge their debt both by using quotation marks where appropriate and by proper referencing such as footnotes or citations. Plagiarism is a major academic offence. Academic offences are taken seriously and attended by academic penalties which may include expulsion from the program. Students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence at the following website: https://www.uwo.ca/univsec/pdf/academic_policies/appeals/scholastic_discipline_grad.pdf

All required papers may be subject to submission for textual similarity review to the commercial plagiarism-detection software under license to the University for the detection of plagiarism. All papers submitted for such checking will be included as source documents in the reference database for the purpose of detecting plagiarism of papers subsequently submitted to the system. Use of the

service is subject to the licensing agreement, currently between The University of Western Ontario and Turnitin.com (<http://www.turnitin.com>).

CONDUCT

Students are expected to follow proper etiquette to maintain an appropriate and respectful academic environment. Any student who, in the opinion of the instructor, is not appropriately participating in course activities and/or is not following the rules and responsibilities associated with the course activities, will be reported to the Associate Dean (Graduate) (after due warning has been given). On the recommendation of the Department concerned, and with the permission of the Associate Dean (Graduate), the student could be debarred from completing the assessment activities in the course as appropriate.

HEALTH/WELLNESS SERVICES

As part of a successful graduate student experience at Western, we encourage students to make their health and wellness a priority. Western provides several health and wellness related services to help you achieve optimum health and engage in healthy living while pursuing your graduate degree. Information regarding health- and wellness-related services available to students may be found at <http://www.health.uwo.ca/>.

Students seeking help regarding mental health concerns are advised to speak to someone they feel comfortable confiding in, such as their faculty supervisor, their program director (graduate chair), or other relevant administrators in their unit. Faculty of Engineering has a Student Wellness Counsellor. To schedule an appointment with the counsellor, contact Kristen Edwards (khunt29@uwo.ca) via confidential email and you will be contacted by our intake office within 48 hours to schedule an appointment.

Students who are in emotional/mental distress should refer to Mental Health@Western: <http://www.uwo.ca/uwocom/mentalhealth/> for a complete list of options about how to obtain help.

SICKNESS

Students should immediately consult with the Instructor (for a particular course) or Associate Chair (Graduate) (for a range of courses) if they have problems that could affect their performance. The student should seek advice from the Instructor or Associate Chair (Graduate) regarding how best to deal with the problem. Failure to notify the Instructor or the Associate Chair (Graduate) immediately (or as soon as possible thereafter) will have a negative effect on any appeal. Obtaining appropriate documentation (e.g., a note from the doctor) is valuable when asking for accommodation due to illness.

Students who are not able to meet certain academic responsibilities due to medical, compassionate or other legitimate reason(s), could request for academic consideration. The Graduate Academic Accommodation Policy and Procedure details are available at:

<http://www.eng.uwo.ca/graduate/current-students/academic-support-and-accommodations/index.html>

ACCESSIBLE EDUCATION WESTERN (AEW)

Western is committed to achieving barrier-free accessibility for all its members, including graduate students. As part of this commitment, Western provides a variety of services devoted to promoting, advocating, and accommodating persons with disabilities in their respective graduate program. Graduate students with disabilities (for example, chronic illnesses, mental health conditions,

mobility impairments) are strongly encouraged to register with Accessible Education Western (AEW): http://academicsupport.uwo.ca/accessible_education/index.html

AEW is a confidential service designed to support graduate and undergraduate students through their academic program. With the appropriate documentation, the student will work with both AEW and their graduate programs (normally their Graduate Chair and/or Course instructor) to ensure that appropriate academic accommodations to program requirements are arranged. These accommodations include individual counselling, alternative formatted literature, accessible campus transportation, learning strategy instruction, writing exams and assistive technology instruction.
